10/523841

Parameter	Layer	Direction	Time effect	Influence on	Influence by the PFC
Send/ Get	WSP	UL/DL	Long	Start Point of data transfer	direct
Resume/ Suspend	WSP	UL/DL	Long	Suspend connection/ resume a suspended connection	direct
Transaction Class	WTP	UL/DL	Long	Transaction mode	Not necessary
(selective) retransmission until acknowledgment	WTP	UL/DL	Short	Reliability, used gross bandwidth	Indirect
Selective Acknowledgment	WTP	UL/DL	Short	Retransmission out of the row, reducing wasted bandwidth caused by unnecessary retransmitted packets	Indirect
Asynchronous transaction	WTP	UL	Short	Number of transactions at the same time	Direct
HOLD	WTP	UL/DL	Short	Delaying retransmission	Direct
Sliding transaction window (packet groups)	WTP	UL	Short	Optimizing transmission, burst mode	Direct
Segmentation and Concatenation	WTP	UL	Short	Optimization of packet length	Direct
Send-no send	WDP or IP	UL	Short	Find optimal time to send	Direct
